

Contents

<i>Authors and Acknowledgements</i>	vii
<i>Foreword</i>	ix
<i>Highlights</i>	1
Current Efforts	2
A Brighter Future	2
Land Use and Development	2
Forests	3
Agriculture	4
Chesapeake Bay and its Fisheries	4
<i>Chapter 1: Imagining the Chesapeake</i>	7
The State of the Bay	8
The Chesapeake Futures Project: What We Did and Why We Did It	11
<i>Chapter 2: Risky Business</i>	15
The Purview of Chesapeake Futures	16
Other Glimpses at the Future	18
<i>Chapter 3: Chesapeake Past</i>	21
The Ideal and the Real	21
Changes in the Land and Water	22
The Rediscovery of the Chesapeake	24
Differences Between Chesapeakes Past and Present	25
<i>Demographics</i>	25
<i>Lifestyle</i>	26
<i>Biological Changes</i>	26
<i>Municipal Wastes</i>	27
<i>Nutrients</i>	27
<i>Contaminants</i>	28
<i>Changes in the Land</i>	29
<i>Chapter 4: Changing Times</i>	31
The Aging Bay	32
Climate Variability	34
Climate Change	37
Model Predictions of Climate Change	37
Human Population and the Economy	42
Technology and Human Development	43

Chapter 5: Development and Sprawl	47
Patterns of Growth	47
Consequences of Sprawling Development	49
Fighting Sprawl	51
Scenario Assumptions	55
<i>Population Projections</i>	56
<i>Development Projections</i>	56
<i>Effects on Nutrient Loadings</i>	59
<i>Impacts on Resource Lands and Streams</i>	59
<i>Caveats</i>	60
Scenario 1: Recent Trends	60
<i>Primary Expectations</i>	60
Scenario 2: Current Objectives	64
<i>Primary Expectations</i>	64
Scenario 3: Feasible Alternatives	65
<i>Primary Expectations</i>	65
 Chapter 6: Forests in Transition	 69
Why Forests Matter	69
<i>Nutrient and Sediment Retention</i>	70
<i>Riparian Forests</i>	70
<i>Forest Fragments</i>	71
<i>Forest Wildlife</i>	72
Forest Economics	72
<i>Forests in the Chesapeake Bay Region Economy</i>	72
Forests in a Changing Environment	74
<i>Forests as Nutrient Sinks</i>	74
<i>Forests and Global Warming</i>	75
Scenario 1: Recent Trends	75
<i>Primary Expectations</i>	75
Scenario 2: Current Objectives	78
<i>Primary Expectations:</i>	78
Scenario 3: Feasible Alternatives	79
<i>Primary Expectations Based on Land-Use Simulations</i>	79
<i>Further Expectations if Alternatives are Implemented</i>	79
 Chapter 7: Adapting Agriculture	 85
Current Status of Chesapeake Agriculture	85
Socioeconomic Trends and Implications	86
<i>Commodity Markets</i>	86
<i>Input Markets</i>	88

<i>Technology Drivers</i>	89
<i>Public Policies and Institutions</i>	89
Scenario Assumptions	90
Scenario 1: Recent Trends	93
<i>Primary Expectations</i>	93
Scenario 2: Current Objectives	94
<i>Primary Expectations</i>	94
Scenario 3: Feasible Alternatives	95
<i>Primary Expectations</i>	95
Chapter 8: Technological Solutions	97
Nutrient Sources in Perspective	98
Human and Industrial Wastes	100
<i>Advanced Wastewater Treatment</i>	100
<i>Septic Systems</i>	101
Crop Production	101
<i>Soil Conservation Practices</i>	102
<i>Subsurface Nutrient Application</i>	103
<i>Cover Crops</i>	103
<i>Precise Nutrient Management</i>	104
Animal Production	105
<i>Using Animal Waste</i>	105
<i>Treating Animal Wastewaters</i>	106
<i>Reducing Nutrients in Animal Wastes</i>	107
<i>Integrating Animal and Crop Production</i>	108
Controlling Runoff from Developed Land	109
Atmospheric Emissions	109
Environmental Rehabilitation Technologies	112
<i>Wetlands and Riparian Buffers</i>	112
<i>Submerged Aquatic Vegetation</i>	112
<i>Oyster Reefs</i>	113
Observation and Prediction Technologies	113
<i>Remote Sensing</i>	113
<i>Automated Observation Systems</i>	115
<i>Integrated Analysis</i>	116
Scenario Assumptions	116
Scenario 1: Recent Trends	117
<i>Primary Expectations</i>	117
Scenario 2: Current Objectives	118
<i>Primary Expectations</i>	118
Scenario 3: Feasible Alternatives	120
<i>Primary Expectations</i>	120

Chapter 9: Once and Future Bay	125
Physical Characteristics	126
<i>Sea Level Rise</i>	127
<i>Freshwater Inflows</i>	127
<i>Sediments</i>	129
<i>Wetlands</i>	131
Toxic Contamination	134
Trophic Status	135
<i>Nutrient Loadings</i>	136
<i>Dissolved Oxygen</i>	140
<i>Water Clarity</i>	142
<i>Biological Production</i>	143
Life in the Bay	144
<i>Health of the Ecosystem</i>	144
<i>Living Resources</i>	147
Scenario 1: Recent Trends	148
<i>Primary Expectations</i>	148
Scenario 2: Current Objectives	148
<i>Primary Expectations</i>	148
Scenario 3: Feasible Alternatives	149
<i>Primary Expectations</i>	149
 Chapter 10: Chesapeake Choices	 153
Land Use And Development	153
Forestry	154
Agriculture	155
Chesapeake Bay and its Ecosystem	158
Final Thoughts	158
Choices for the Chesapeake	159
