

Last Name	First Name	Expertise
Ball	Bill	physical-chemical processes affecting contaminants – fate and transport in both engineered and natural systems
Behr	Joshua	analysis and social sciences
Benham	Brian	agricultural engineering/BMPs
Beyrouy	Craig	soil chemistry, soil science, soil conservation
Bilkovic	Donna	marine ecologist/near-shore habitats
Bohlke	John Karl (JK)	hydrogeology, biogeochemistry, isotopic tracing, nutrients
Boomer	Kathleen	ground- and surface-water monitoring
Bott	Charles	environmental/wastewater engineering
Brosch	Christopher	soil nutrient and water quality science, nutrient management programs
Bunting-Howarth	Katherine	(Alternate) Watershed management, coastal management, environmental law, human dimensions
Collick	Amy	Agricultural and biological engineering, research hydrologist, and watershed management
Dennison	Bill	marine biology/water quality indicator indexes
Easton	Zachary	Hydrology/watershed modeling
Fowler	Lara	environmental and natural resource law
Fink	Alix	civic issues/involvement
Friedrichs	Carl	marine hydrodynamics, sediments
Friedrichs	Marjy	hydrodynamical/ecological modeling
Havens	Kirk	wetlands ecology/natural resource law and policy
Herrmann	Maria	marine biogeochemistry/coastal carbon cycle
Hershner	Carl	ecosystem management/marine ecology
Hubbart	Jason	biophysics
Ihde	Thomas	fisheries ecosystem modeling/ fisheries pop. dyn.& stock assessment
Julius	Susan	urban/aquatic climate change impacts and adaptations
Karimi	Hamid	environmental policy/stream and wetland restoration/WWTPs
Kleinman	Peter	soil phosphorus
Lowenfish	Martin	geography, conservation efforts, enhancing collaboration
Luckenbach	Mark	benthic ecology
Lundy	Chancee	environmental engineering/community outreach
Miller	Andrew	urban hydrology/fluvial geomorphology
Monaco	Mark	research/monitoring/assessment on the distribution and quality of habitats and the ecology of living marine resources & contaminant monitoring and assessment
Newbold	Steve	Ecological and economic modeling for environmental policy evaluation, especially benefit-cost analysis
Newburn	David	environmental and resource economics
Ribaudo	Marc	agricultural/water quality economics/policy
Shirmohammandi	Adel	agriculture modeling
Stephenson	Kurt	agricultural economics
Wainger	Lisa	environmental economics, social sciences
Wardrop	Denice	freshwater wetlands ecology
Yagow	Gene	agricultural engineering/biological systems engineering
Zhu	Weixing	ecosystem ecology/urban ecosystems/restoration ecology/invasive plants
